NAPA UPCOMING WEBINARS

Structural Design of Private Market Asphalt Pavements

Date: Thursday, August 4, 2022

Time: 2:00 pm to 3:30 pm EDT

Speaker: Tim Murphy, P.E., President, Murphy Paving Technology, Inc.

Description: This webinar is for civil and geotechnical engineers and architects who seek to learn more about designing asphalt pavements. This webinar will teach proper design methodology and will offer best practices to ensure thickness design of proper long-lasting asphalt pavement parking lots, warehouses, and distribution centers (DCs).

Asphalt Production & Construction

Date: Tuesday, September 13, 2022

Time: 2:00 pm to 3:30 pm EDT

Speakers: Steve McReynolds, Director of Operations, Asphalt Testing Solutions & Engineering and TJ Young, Production Manager, Duval Asphalt

Description: Civil and geotechnical engineers often specify asphalt for projects but don't always get the opportunity to learn about production and construction of the product. This webinar will take attendees behind the scenes using drone video to explore the asphalt production process leading up to delivery on-site. Furthering this educational opportunity, engineers will learn about the construction process by watching asphalt placement and hearing tips to specify and design high-quality jobs presented by experienced asphalt experts.

Best Practices for Design of Low Volume Asphalt Parking Lots and Commercial Applications

Date: Tuesday, November 1, 2022

Time: 2:00 pm to 3:30 pm EDT

Speakers: Mike Skinner, P.E. Director of Pavement Engineering, Colorado Asphalt Pavement Association

Description: Parking lot pavements have significant differences than traditional roadway pavements. Material types, mix design, and construction practices will be discussed to improve service life and reduce maintenance costs. Attendees will be equipped with best practices for designing asphalt parking lots.
